PROJECTS

URL Shortener App [Frontend] [Backend] [Live]

- I created a backend to handle requests to get a long URL and convert a long URL to a short URL.
- Added toast component to show all url like a notification in nuxt frontend app.
- Implemented proper error handling in security practices in backend app and added form validation while requesting a short URL.
- Technology Used: **Nuxt.js, Vercel, Mysql, Node.js, Express, Tailwind, Composition API, Typescript.**

Weather Application [Frontend] [Live]

- Developed Weather Application using **React JS** which shows current city's weather and user able to search for other city's weather.
- Integrated **Bootstrap** and **SCSS** to customize the bootstrap theme and write CSS.
- Utilized **Openweather APIs** and used browser's geolocation api to find the current location.
- implemented the **search** and **show weather** functionality.

HomeAppliances Application

- Developed Web Application to show Home Appliances to end customers by salesperson.
- Implemented filteration functionality to show Home Appliances as per the Price, Rating, and Features etc.
- Developed dynamic **colour theming functionality** as per the brand's colour theming.
- Technology Used: **React, Redux, HTML, CSS, Javascript, SCSS.**

Sports Event Management Site

- Developed a CMS-based sport management site using **ApostropheCMS** where admin can manage the content to show guest users.
- Created **OOPS based individual module** to add gallery, news and events on site.
- Coordinated with DEV-OPS team for **deployment process** of application.
- **Created REST APIs** to add gallery, news and events and improved existing signup module to add **HCaptcha** functionality in signup and login page.
- Tech Used - **Vue js, Mongodb, Nunjucks, Node/Express.**

ACHIEVEMENTS

- Made open source contribution in absolution and sanitize-html repo and wrote test cases using mocha, and jest [Link].
- 5 stars on HackerRank in Problem Solving [Link].
- Solved 190+ problems on GFG [Link].
- Solved 100+ problems on leetcode [Link].

SKILLS

Programming Languages	Java, JavaScript, Typescript
Web Development	Spring Boot, React, Redux, Node js, Vue js, Vuex, HTML, CSS, Bootstrap
Databases:	MongoDB, Mysql
Concepts	Data Structures and Algorithms, Object-Oriented Programming
